Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to a method for providing computer programs to aid in the design of an integrated circuit and receiving payment upon satisfaction of the trigger or job.
- II. Claims 12-17, drawn to method for receiving a first payment and a second payment upon completing a trigger or job, as agreed upon in a contract.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed. The subcombination has separate utility by itself such as receiving a first payment and a second payment for performing and completing a particular task.

Art Unit: 3622

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art and required a separate search and hence, restriction for examination purposes as indicated is proper.

A telephone call was made on 06/16/04 to request an oral election to the above restriction requirement and did result in the election, without traverse, of claims 1-11 for examination.
